

2003

Hello and Happy Fall to Everyone!

Before you get too busy with holiday shopping, football and whatever your "indoor" activities might be, think of the advantages of speaking with us now about your outdoor living needs, wants and dreams for now and next year.

There's still time to plant a variety of ornamentals. You might be surprised by all the great plants that are still available this late in the season.

Late autumn conditions are, in my opinion, the best for planting because cooler nights are guaranteed. Of course, I sometimes speak with clients, and they ask me why it can't wait until spring. Sure it can. And most of our clients do wait until it's time to plant or treat before they call.

But right now is the best time, not only for planting, but also for giving you more individual attention than we can in the thick of a busy spring. Remember...there are only so many days in the spring, and now is a great time!

Make your dreams a reality by having a professional consultation of your landscape. Our most comprehensive is the Digital Landscape Plan - our designers will come to your site and speak to you in detail. By meeting with you, we can save you money down the road...but I'll explain that in a moment. We'll discuss your needs, wants and dreams. We'll also take a digital image, before and after, so you can see the change in your landscape at completion.

You will also receive a detailed, computerized overview plan (the quote to do the work). Our work comes with a 30-day, no-questions-asked warranty on our woody landscape materials, or you may choose to purchase an extended warranty plan. We will also give you general care instructions on your new plantings.

There is a fee to provide the above service, but our fee will save you money. And, it is prorated into your proposal if we are contracted to perform the job.

Talk to us about your dreams. We'll do everything we can to answer your questions and help you get a head start on a great landscape.

I appreciate your business and your replies to our surveys.

Thanks!

Fall is Fantastic

for Adding Looks and Livability to Your Landscape

Fall may sometimes be associated with the slowing of your outdoor work, but it's actually a time for having landscape work done.

If your landscape needs some reworking or a complete redo, fall is a great time. We'll clean up, give your property a great "face lift," and leave your place primed for spring enjoyment. From the entryway to the driveway, and from ground covers to lawns, fall is for planting!

New plantings can easily go in now. Fall-planted shrubs and trees establish quickly because their green parts have stopped growing, making nutrients more available to their roots. The root system that develops now will support rapid growth and green-up in the spring. Supplies and selection are great in the fall, so let us install that longed-for spring bloomer or row of screening shrubs.

Maybe your entryway could benefit from some sprucing up. If shrubs are straggly, blocking views from inside or detracting from your home's exterior features, we can help. We'll trim up or pull out those monsters, tidy up ground cover areas, and widen beds. We can help you choose shrubs that will stay in line while providing seasonal color and year-round beauty that you'll love coming home to. We also have lots of ways to improve and widen walkways to make your home more accessible and welcoming.

Are you ready to finally add the pool, gazebo or hot tub your family has been asking for? Make next year's outdoor season complete by having it put in now. You'll be able to enjoy it from the first warm days of spring.

Whatever your landscape needs, we're ready to help. Our crews are less busy right now than during the spring rush, so please give us a call with questions or to schedule a personal consultation.
